PREFACE

The series of Public Record Office *Lists and Indexes*, originally published by Her Majesty's Stationery Office between 1892 and 1936 and now reprinted by Kraus Reprint Corporation, constitutes only a very small (though important) part of the means of reference to the national archives of England. Many volumes in the printed series are continued or amplified in compilations which have hitherto been available only in typed or manuscript copies on the shelves of the Record Office's search rooms. A number of these compilations have been selected for reproduction and issue by the Kraus Reprint Corporation in this *Supplementary Series of Public Record Office Lists and Indexes*.

This *List of the Lands of Dissolved Religious Houses* expands one category of entries in the *List of Ministers' Accounts*, Part II, Henry VII and Henry VIII (which is No. XXXIV in the original printed series of *Lists and Indexes*). In the printed list, the accounts of royal ministers for the possessions of dissolved monasteries are briefly noticed under the counties in which the monasteries severally lay. In this Supplementary List the lands named in the earliest surviving post-dissolution account for each monastery's possessions are listed in detail as they occur in the original manuscripts. There is an exhaustive index of places, in which cross-reference is used to identify obsolete forms of place-names with those on the modern map.

NOTE

This list, arranged in alphabetical order of counties, was begun many years ago by Mr. M. S. Giuseppi, who did it as far as the middle of Norfolk. That county was finished and Northampton begun by Mr. (now Professor) V. M. Galbraith. Mr. A. C. Wood completed the work.

In each case the list is made from the earliest account available after the suppression, usually the first, though in a few cases the first account is missing. A casual inspection of some later accounts shows that they frequently give much less detail and contain many errors in the spelling of names from which the first account is free.

The list gives the lands of the religious houses in more detail than the Monasticon but does not give the values. Where the minister does not account because the lands have been granted away particulars of the grant are given. The places have not been identified in the list but in the accompanying index. The references in the index are to the numbers shown in italic at the head of each entry in the text. The letters following the numbers in the index were originally used to indicate the pagination of an earlier recension: they have been retained here to guide the reader to the approximate position of a name within a long entry.

The reference to each document is S.C. 6/Hen. VIII/and the number of the roll, which is given in the left hand margin.

14 October 1949
